THE STORY

- You are on the Path of Ascension to becoming true gods.
- Play as Achilles, Hercules, and other demigods to fight against the gods to become one yourself. Each character is an NFT generated by the base stats, mentioned in the following slides.
- NFT rarity depends on the family tree of the gods. For example, if you have a mortal + Zeus... a demigod is the result. If you have Zeus + Hera [2 gods], then you've hit the jackpot. Rarity depends on the family tree of your character.
- Whether you decide to visit Atlantis and play casually, or fight your way to the citadel in Zion, it's your journey. If you are defeated in Zion, however... you will be banished from the realm forever!

GENERATIVE ART IN A GAME

The generative art NFTs launched will be used as your character in the game.

We will first mint generative NFTs for the community. These NFTs are not only your avatar and PFP, but will be your IN GAME character as well. Each character NFT will have its class, as well as base attributes. Also, your equipment will be generative NFTs too. This includes weapons and armor, as well as other rare items.

CHARACTER STATS

NICK

HP

100

MP

50

ATT

5

DEF

5

Skills

Skills

Character stats are dependent on 6 base abilities. These 6 abilities plus the character's class will determine the attributes of attack power, defense, magic points and overall health. For example, rolling higher strength will mean the character's attack points will be higher on mint. With more charisma, the luck and chances of the enemy dropping legendary loot will be higher, and so on.

BASE ABILITIES

- 🗡 STR [strength]
- 🧪 INT [intelligence]
- ⚡ DEX [dexterity]
- 🛡 CON [constitution]
- ⭐ WIS [wisdom]
- 💎 CHA [charisma]

STATS

- 🔥 HP [hit points]

- 🌀 MP [mana/magic points]

- 🗡 ATT [attack]

- 🛡 DEF [defense]

CHARACTERS

Dēmīgōds

ACHILLES

HERACLES

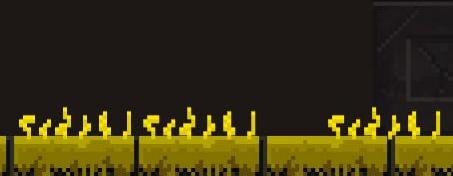

PERSEUS

MEMNON

With each character as a generative NFT, there are many roles that you can play as to support your team. For example, you can choose to be a healer, tank or DPS. The holy trinity of MMO still has effect here! Game characters are demigods and mortals... for now...

x3

IN-GAME NFT ITEMS

Equipment,
Consumables,
Legendary Loot,
And More!

CRAFTING & Upgrades

Loot NFTs will fuse with your Character NFT through a bonding process. Equipment wise, there are 4 slots. One for weapons, one for armor, and the remaining two are general slots. Spend your XP to customize or upgrade your character. Spend \$RELIC tokens to forge new weapons and armor, and follow the recipe for "Item Crafting". There will also be special items such as a "resurrection stone" which can bring you back from death. However, this will take up one of your general equipment slots, leaving you with an equipment disadvantage. One of our focuses is game balancing to ensure fun gameplay.

MAP

2 GAME MODES

CASUAL MODE [ATLANTIS]

Stake into the pool and autoplay will run the game for you. Earn XP & \$RELIC passively. However, leveling up will be much slower on this mode.

HARDCORE MODE [ZION]

Risk it all! If you want to upgrade your character and get legendary loot, you will have to play this mode and fight your way to the citadel. Be weary though, you only have limited lives. If you lose all your lives you will never be able to enter this game mode again! Your character will still be playable in Atlantis, however.

DESKTOP PREVIEW

MOBILE DEVICE PREVIEW

Dual Token MODEL

● \$MGOD

and

● \$RELIC

x3

982,128,313

Used to buy adventure packs, enter raids, marketplace

Our \$MGOD token will be used to buy adventure packs; consisting of characters, equipment, weapons and consumables. It will also be used as an entry fee to enter raids, tournaments and other special events. \$MGOD will also be used for staking, governance, and payment for marketplace transactions.

\$MGOD TOKEN

📜 SPECIAL EVENTS

Drops, Tournaments, Boss Challenges

We will have weekly special events with boss challenges [extremely high APY] to incentivize the community to band together and fight against the gods. The reasoning for the high APY is because this is only available in hardcore mode. Also, we will be having tournaments and random airdrops for holidays and special occasions.

x3

982,128,313

In-Game Currency

The \$RELIC token will be used for in-game purchases of consumables and marketplace activity. Our play to earn feature will allow players to earn the token slowly. Special in-game merchant mechanics will help stabilize the price. For example, one long sword will always be worth 100 \$RELIC tokens. This provides initial liquidity for players as well as overall economic stability. Thus, on the secondary market it can be sold for more, giving more value to items. Loot dropped on the ground are artifacts.

\$RELIC TOKEN

BUILDING CLANS

Squad up with your fellow demigods to earn more APY

We are embracing Social GameFi. We believe games are meant to be played with friends, so we have coined this new term to ensure people play together. For example, before entering a realm, it is best to have a mix of character classes best suited for the mission. With the holy trinity of MMO, you have a better chance to win against the pantheon to earn those sweet, sweet APY rewards.

TEAM BUILDERS

JACK N.

Project Manager

Sisyphus (Jack) toils daily for the metagods. Much like the rock he pushes up the mountain for eternity, he devotes his life to the creation of good games and the metaverse as a whole.

SNAKE T.

Creator of Art

Prometheus (Snake) created humanity from clay. With over a decade of experience in game design and all art styles, he once again is creating life in the world of the metagods. Ex-Animoca.

EDDIE W.

Game Developer

The legendary slayer of Medusa, Perseus (Eddie) now rules over the realm of programming and game development. Building games is his passion, and he will not stop until the metagods universe is complete. Ex-Activision Blizzard.

ROB C.

Blockchain Veteran

Also known as the god of war, Kratos (Rob) is the divine personification of strength. A veteran of the blockchain industry, he leads the metagods to forge a new frontier, where gaming and blockchain coexist in perfect harmony. Ex-Triple A Game Studio.

TEAM COMMUNITY

ATHENA

Community Manager

Athena is the olympian goddess of wisdom and war. She is adored by her community, the city of Athens. She joins the metagods to build up the new metaverse community.

APOLLO

Social Media

As the greek god of sun and light with music and poetry as his hobbies, Apollo is perfect as our social media specialist. His guiding light and unrelenting passion of the arts allows him to build an amazing social media presence for the metagods.

ARTEMIS

Marketing

Artemis is the goddess of the hunt. In marketing, you are constantly hunting for new campaigns and methods to propel your team forward. Artemis leads by her intuition, and isn't afraid to take risks. With her on the metagods team, we are unstoppable.
